TEXTILE WORLD • INDEX TO VOLUME 100

JANUARY to DECEMBER, 1950

McGRAW-HILL PUBLISHING CO., 330 West 42nd St., New York

A

Alabama Textile Operating Executives Carding and spinning discussed (F) Jan. 98

American Assn. of Textile Chemists & Colorists. Portsmouth, N. H. convention (F) ..... Nov. 171
Meeting (F) ..... Dec. 128

American Textile Machinery Exhibition (F) ..... July 101–153
Guide to exhibitors ..... May 145
Peeks behind the curtain Mar. 144; Apr. 156 ..... May 122

Alabama Textile Operating Executives Slashing and weaving practices discussed (F) ..... Aug. 129

B

Bibliography on textile industry and technology comp. by R. C. Scott (F) Aug. 87

C

Canada—Pneumafil installed on worsted frames will pay for itself within year. J. W. MacLeod (F) ..... June 111

Cotton—How to stack cotton bales more efficiently ..... Dec. 151

Cotton Manufacturing

Abrader parallels wear action ..... June 138

Absorbency increased by proper processing ..... July 206

Acala cotton shows big improvement. Goldthwait & Smith (F) ..... Sept. 127

Acala cotton trouble. Stansbury & Hoffpauir (F) ..... May 95

Accurate nep counts depend on set routine ..... Mar. 180

Alabama Textile Operating Executives meet (F) ..... Aug. 129

Alabama Textile Operating Executives discuss carding and spinning (F) Jan. 98

Aluminum warp beam has rubber-tired rims ..... Mar. 150

Anti-friction spindle ..... Sept. 137

Avondale Mills human-relations program. P. M. Thomas (F) ..... Oct. 121

Base nep count on weight of sliver, May 248

Bleaching, continuous, has advantages in U. S. ..... Nov. 210

Bleaching plant, small ..... Mar. 146

Bleaching range designed for small lots. Aug. 135

Blending cotton and strips. R. H. Pharr May 130

Bobbin of plastic ..... May 140

Bobbin unbalance measured by instrument ..... Nov. 176

British winder ..... Oct. 152

Can cotton-fiber tests be made on machines? ..... Dec. 200

Canadian textile seminar discusses modern methods ..... Dec. 139

Card knife plates set with trowel gage. T. J. McCarthy ..... June 156

Card-room waste is easily controlled. R. H. Pharr (F) ..... May 72

Card webs used for bonded-web fabrics. June 180

Card-wire variations. T. J. McCarthy. Sept. 283

Carder a judge of fineness and length? William Shaw ..... Sept. 168

Caustic soda and hypochlorite produced by small unit ..... Nov. 180

Chain drive builds better bobbins. May 116

Chalk marks help reduce imperfect work. E. H. Helliwell (F) ..... Jan. 113

Chart for yarn numbering. T. G. Hicks. Aug. 156

Check sweeping waste to save your money. R. H. Pharr ..... June 164

Circuit used to check bobbin wear. W. C. Ginson ..... June 156

Clamp, adjustable, holds loom shuttle. Aug. 151

Clamp for cotton bales ..... July 226

Classing cotton by artificial light. E. D. White (F) ..... Oct. 129

Classing light for wall-to-wall ..... Aug. 135

Clips join cloth ends for wet processing. E. Swindells ..... Feb. 186

Cloth guiders ..... Mar. 150

Cloth-inspection machine has under lighting ..... Apr. 170

Cloth-pulling machine moves wet or dry cloth ..... June 142

Cloth-room operations are being made more efficient. E. D. White (F) .. Apr. 126

Cloth tension bars curved as desired. E. Swindells ..... May 128

Collins & Aikman develops a universal drafting system. W. A. Newell (F) June 89

Colored bands on cans avoid sliver mixups ..... Mar. 162

Comb box eliminates oil seepage .... Jan. 126

Comber has improved detaching motion. Aug. 142

Conditioning oil used in cotton processing ..... Mar. 168

Contraction requires draft correction. J. F. Bogdan (F) ..... Apr. 107

Controlling, measuring, testing equipment at American Textile Machinery Exhibition (F) ..... July 143

Conveyor feeds spooler, removes quills. July 171

Corduroy—backstarching binds nap .... Mar. 186

Core with metal end ..... May 112

Cotton-slashing system more economical than silk ..... Apr. 202

Counter reads in dollars and cents. Sept. 146

Creased selvages can be remedied . Aug. 176

Crepe-yarn quilling wind open to debate. Jan. 146

Crepe and voile yarns conditioned by special machine ..... May 118

Crown College improves package-dyeing system. C. H. Leach (F) ..... Oct. 92

Design your own reeling diamond pattern. R. M. Harbeck (F) ..... May 85

Device measures yarn and sliver .... Oct. 148

Device removes trash from cotton. July 232

Dobby cord and shaft held securely. F. M. Giordano ..... Mar. 166

Double-diameter shell cuts twist in half. Arthur Spivey ..... Nov. 198

Doubling-frame teeth controller .... Mar. 154

Dowel pin prevents splitting of binder. Aug. 140

Drafting picker lap lessened lickerin damage. Francisco Pless ..... Jan. 139

Draw-frame elimination may not be for you ..... Oct. 174

Drawing-frame inspection can reduce yarn variations. L. A. McComb (F). Jan. 93

Dryer efficiency. Leo Walter (F). Aug. 100

Drying-cylinder cover has forced draft. Jan. 128

Dyeing "dead" cotton helped by mercerization ..... Feb. 204

Dyeing with coprantine colors. M. G. Stern (F) ..... Apr. 132

Electrical equipment can be cotton mill fire hazard. Swaffield Cowan (F) Aug. 116

Elimination of drawing processes. Aug. 160

Empty bobbins affect traveler drag. E. H. Helliwell (F) ..... Sept. 135

Erwin modernizes a run-down mill. M. M. Rogers, Jr. (F) ..... Dec. 104

European machinery offers tests of new ideas. E. D. Fowle (F) ..... Feb. 120

Examining, measuring machine .... June 144

Feeder hopper has swinging back . Aug. 154

Fiber array service ..... Jan. 136

Fiber-converting plant—Collins & Aikman's Norwood Mill (F) ..... Sept. 106

Fiber tester ..... Feb. 170

Filling-quill cleaner is made from a barrel. M. A. Morrisseau ..... Mar. 160

Filling separator helps weaving .... Sept. 160

Filling winder attached to loom ... June 137

Filter changes medium automatically. Oct. 150

Four new trends in slasher controls (F). Mar. 137

Frame checking assures uniformity. Richard Crossley (F) ..... Apr. 139

Frame efficiency figures can show up losses. H. P. Lynch (F) ..... Feb. 145

Full warp wind is seldom desirable. Mar. 188

Garment deterioration has several causes ..... Mar. 198

Georgia men answer 16 carding questions (F) ..... June 127

Good top-roll covers vital to quality yarn. E. H. Helliwell (F) ..... Jan. 89

Guard on slubbers reduces end breakage. William Shaw ..... Feb. 184

Guide designed for winders ..... May 112

Guides for folder increase production. May 136

H. & B. introduces new drafting system ..... Apr. 238

Hand needle uses ..... Apr. 164

Here's a mill man's lab. Erwin Mills. W. A. Thomason, Jr. (F) ..... Oct. 89

Homemade clearers stopped our "eyebrowing" ..... Sept. 156

Hook under thread board catches whipping end. William Shaw ..... June 158

Hose on waste machine reduces fire damage. Yivinn Stephansen ..... Feb. 180

How much drawing is now necessary? May 138

How much power does a spindle use? Dec. 122

How to estimate turns per inch in yarn. T. G. Hicks ..... Sept. 158

Humidity systems can be engineered simply. T. G. Hicks (F) ..... June 118

Hypochlorite process bleaches fast and safely ..... Oct. 196

In my lifetime. H. G. Lord (F) .... July 154

Incoming-material inspection pays off. Jesse De La Rama (F) ..... May 71

Inspector marks defects with heavy sewing thread ..... Jan. 148

Instrument locates static electricity. June 148

Instrument measures color of cotton. May 111

Instrument records downtime of machines ..... June 144

Italian cotton yarn mill has unusual machinery (F) ..... Aug. 108

Know mill processes to identify defects. J. B. Goldberg (F) ..... Aug. 104

Labeling machines for yarn packages. Sept. 144

Lap-handling system meets unusual demands. E. D. White (F) ..... May 92

Larger spinning ring will not increase twist ..... Mar. 178

Layout of mill revised to provide for future expansion. H. W. Roos (F). Apr. 103

Limits to process elimination ..... Apr. 172

Lockstitch machine ..... Oct. 152

Loom cam lever protected by wood. J. M. Trebilock ..... Jan. 139

Loom cloth roll has wrinkle chaser. C. R. Betger ..... June 158

Loom conditions cause uneven weaving. May 272

Loom picker stick reinforced with metal. A. S. Musto ..... May 134

Lug-strap connector ..... Aug. 138

Machinery developments in 1950. W. A. Newell (F) ..... Feb. 112

Magnet for tramp iron removal .... Sept. 146

Magnifier tester for small area .... Jan. 130

Measure top-roll wear to guide in regrinding ..... Apr. 166

Measure up your quality-control lab. Dame S. Hamby (F) ..... Sept. 120

Mechanical holders help rolled selvages. Apr. 198

Mercerization made less costly through new instrument. R. C. Scott (F) June 106

Method of nep count used for combed tops ..... Apr. 174

Micarta lap roll made standard .... Feb. 168

Mill activity will be high again in 1950. R. C. Scott (F) ..... Feb. 107

Mirror on perch saves inspector time. M. A. Morrisseau ..... Mar. 164

Nep-count test is useful in the mill. Apr. 200

New lay gear formula more accurate. C. F. Brogan (F) ..... June 136

New openers and pickers make evener, cleaner laps. P. M. Thomas (F) Mar. 112

1950 expenditures and commitments reach an all-time high. R. C. Scott (F) ..... Nov. 108

1950 production more sustained than in 1949. R. P. Ulin (F) ..... Feb. 108

No standards for yarn winds ..... Mar. 194

Nylon-plastic saddle ..... Oct. 184

Off-traverse rings cause slough-offs. Sept. 287

Opener gives cleaner cotton ..... Nov. 176

Pacific Converter. J. B. Kennedy, Jr. (F) ..... May 76

Package-dye plant is well planned. Avery-Foyle Mfg. W. A. Thomason, Jr. (F). Oct. 112

Peg pattern chains with special pliers. H. E. Wenrich ..... Mar. 166

Pick counter records and prints .... May 114

Picker ball and shoe time the loom pick. May 270

Pile-loom wire motion ..... Jan. 134

Preshrunk fabrics must meet requirements ..... Aug. 174

Print washing should be fixed. T. Patrick (F) ..... Aug. 127

Processing cotton. K. D. Ballouf & others ..... Dec. 128

Quality control men are out of the dark. W. A. Thomason, Jr. (F) ..... Oct. 94

Quiller creelboard has permanent studs. J. L. Rankin ..... Aug. 158

Radioactive thickness gage ..... Oct. 156

Rectangular-eye heddles reduce friction. Oct. 145

Reduce trash in yarn by close check on pickers. R. H. Pharr ..... Oct. 172

Refrigeration can pay for itself. P. L. Davidson (F) ..... Feb. 158

Relation of fibers and yarn influenced by several factors. Webb & Richardson (F) ..... Feb. 128

Reworkable cotton waste given in percentages ..... Mar. 200

(F) indicates feature article

Ribbon mill increases production by cotton system slashing rayon yarns. E. D. White (F).....Jan. 117
Roll picker has a new use. J. L. Garrett, Jr.....Sept. 158
Roving defects have simple causes and remedies. R. H. Pharr (F).....June 135
Roving-frame change gears.....May 132
Rubber tubing stops roll vibration. William Shaw .....June 162
Seersucker crinkle .....June 174
Selvage marking machine.....Feb. 168
Separators of piano wire.....Sept. 156
Sewing machine, chainstitch.....July 174
Short method can estimate net products. Apr. 176
Shuttle gage .....Sept. 294
Size-cooking tanks of stainless steel. Apr. 152
Skein reeling operations for all types of yarn. R. W. Harbeck (F).....Apr. 130
Slasher cylinder uses less steam....Oct. 154
Slasher drive and tension control. Feb. 174
Slasher take-up uses magnetic-clutch motor. J. S. Campbell (F).....Oct. 108
Sliver condenser .....Aug. 138
Sliver holder for top of drawing can. Feb. 188
Smooth builder and dog cause tangled roving. William Shaw.....July 156
Southern Textile Exposition (F)....Nov. 147
Spindle-oiling machine carries its own power .....Sept. 140
Spinning tension measured continuously. P. C. Wolters (F).....Dec. 153
Spooler production can be upped. H. P. Lynch (F) .....Oct. 129
Spreader lays goods face-one-way. Nov. 182
Spring clip holds end of sliver. Rolling Place .....Sept. 292
Stainless steel cloth trucks.....June 146
Standards departments—report. C. W. Bendigo (F) .....Mar. 101
Starch in cotton warps averages better than 6% .....Jan. 150
Supplies and accessories at American Textile Machinery Exhibition (F) .July 138
Switches custom-built for textile machines .....Apr. 256
Tension control used on roving frames. William Shaw .....Mar. 170
Tension does not distort loop-selvage fabrics .....Oct. 192
Tension hanger for right or left rotation. Jan. 134
Tension meter .....Mar. 144
Tensiometer uses strain gages.....June 140
Tenter clip easily changed .....Jan. 121
Terry towel finishing and manufacturing. July 216
Test your textile I Q.....May 240
Testing cotton in the mill. E. H. Helliwell (F) .....May 101
Textile Operating Executives discuss spinning (F) .....Aug. 123
37-in. picker lap run on 40-in. card. Mar. 190
Thread guides with narrow slots. Sept. 140
Three loom motions may cause waviness. W. P. Craig.....Oct. 172
Timestudy value depends upon personality and techniques. R. T. Charlton, Jr. (F) .....Aug. 106
Tire-cord uniformity improved by variable stretching. W. M. Scott (F). Feb. 153
Titrations performed automatically. May 112
Top-roll nebs set with gage.....Apr. 164
Top warp beam let-off used to weave terry towels .....Nov. 194
Tramp iron magnets.....July 228
Trends of the textile half-century (F). July 100
Twisting and throwing machinery at American Textile Machinery Exhibition (F) .....Sept. 114
Two ways to test warp sizes—the Monsanto slasher and the Callaway slasher (F) .....Mar. 124
Ultrasonics gets green light for textile industry. W. A. Newell (F).....Jan. 90
Uneven napping has several causes. Sept. 266
Uneven twister causes knots .....July 206
Uneven warp tension caused spots in cloth .....May 267
U. S. Rubber Co. opens new textile development laboratory at Winnsboro, S. C. (F) .....June 98
Use units as fair basis for assignments. Apr. 172
Very small yarn mill may not be economical .....May 184
Viscosity given in centipoise units. June 138
Ware Shoals bleaching controlled by automatic instruments. J. M. Bennett (F) .....Jan. 94
Warp dyeing and slashing in a continuous operation. R. C. Scott (F)....Sept. 114
Warp preparation and weaving machinery at American Textile Machinery Exhibition (F) .....July 120
Washer to process fabric without tension .....May 111
Waterproof coated fabric that breathes (F) .....Mar. 109
Weaveroom swaying stopped by cadence control. G. A. Winterburn (F). Aug. 118
What happens in multiple drawing? Howard Loveless (F) .....Aug. 110
What is the theory in 2-for-1 twisting. Jan. 144
What mean fiber lengths mean to yarn quality. E. H. Helliwell (F)....Mar. 129
Where can your mill use nylon plastic? (F) .....Oct. 103
Where does your cost dollar go in manufacturing. Fred Lindemann (F). Dec. 108
Wick-oiling system used for loom picker. Feb. 188
Winder-bobbin holders replace feed spindles. T. N. Bird .....Nov. 200
Winder bobbins doffed mechanically. S. T. Sorensen .....Oct. 166
Winding machinery at American Textile Machinery Exhibition (F).....July 116
World position of textiles in 1949 (tables) .....Feb. 118
Yarn conditioned during winding operation .....Apr. 147
Yarn cutting knife designed for safety. Apr. 248
Yarn diameter checked during spinning. Feb. 163
Yarn-manufacturing and conditioning machinery at American Textile Machinery Exhibition (F).....July 102
Yarn strength tester operates automatically. M. H. Behrendt .....Jan. 143
Year of new equipment for the textile industry .....Nov. 110-146
Your stakes in waste and work loads. Mar. 202

D

Defects

Bad loom conditions cause uneven weaving .....May 274
Capitalizing on liabilities. C. W. Bendigo .....Feb. 4
Fabric defects—first of a new series (F). Oct. 120
Inspector marks defects with heavy sewing thread .....Jan. 148
Know your mill processes to identify fabric defects. J. B. Goldberg (F). Aug. 104
One weave ran good—another ran badly. May 267
Roving defects have simple causes and remedies. R. H. Pharr (F).....June 135
Showing common defects to help "educate" workers. C. O. Morgan...Jan. 142
Synthetic-yarn defects can often be identified. J. B. Goldberg (F).....June 108
Uneven warp tension caused spots in cloth .....May 267
You can stop crooked filling patterns. E. P. Schremp (F) .....Mar. 116

Designing

Design your own reeling diamond pattern. R. M. Harbeck (F).....May 85
Novelty yarns made on tricot machines. C. W. Bendigo (F) .....Jan. 83
You can stop crooked filling patterns. E. P. Schremp (F) .....Mar. 116

Dyeing and Finishing

AATCC convention features exhibit (F). Nov. 171
AATCC convention—guide to exhibitors (F) .....Sept. 153
Absorbency increased by proper processing .....July 206
Afterglow reduced with sodium silicate. A. E. Jacobson & others .....Dec. 129
Anthraquinone applicable to wool. A. E. Weber.....Dec. 131
Anti-gas-fume powder .....Aug. 148
Bleaching, dyeing, finishing, and packaging machinery at American Textile Machinery Exhibition (F).....July 130
British Terylene presents dyeing problems (F) .....June 117
Brushing machine removes singeing ash. Feb. 114
Canadian textile seminar discusses modern methods.....Dec. 139
Carbonizing-acid tank .....May 114
Color densitometer .....Nov. 184
Colored mixtures for merino mixture worsteds .....Oct. 200
Continuous processing speeds finishing techniques. Rabold & Marius (F). Feb. 114
Continuous ranges proved for dyeing synthetics. F. A. Alter (F).....May 105
Controlling, measuring, testing equipment at American Textile Machinery Exhibition (F) .....July 143
Crochet filling patterns. E. P. Schremp (F) .....Mar. 116
Crown College improves package-dyeing system. C. H. Leach (F).....Oct. 92
Cycleloc controller .....Mar. 132
Dosatron controls liquid viscosity .....Apr. 148
Drying efficiency. Leo Walter (F)..Aug. 100
Drying textiles .....Apr. 174
Dye-laboratory steam bath .....Jan. 202
Dyehouse truck keeps workers dry. Jan. 196
Dyeing "dead" cotton helped by mercerization .....Feb. 204
Dyeing trucks .....Sept. 280
Dyeing with coprantine colors. M. G. Stern (F) .....Apr. 132
Dynel dyeing tips (F).....Dec. 126
Electric device controls liquid level. Apr. 152
Electronic feed control improves pin tentering .....Feb. 166
Fast-color printing done with vat colors. Nov. 209
Fibrous glass—emphasis is on improvements (F) .....Sept. 104
Finish controls shrinkage without stiffening .....Oct. 158
Finishing compounds improved by fatty intermediates. L. J. Armstrong. Dec. 135
Finishing range processes narrow fabrics .....Jan. 126
Flameproof finish permanent.....Oct. 158
Flame-resistant finish .....Aug. 148
Gentle finishing on sweaters gives lofty hand .....Mar. 178
Glass fabrics—permanent dyes and finishes. Margaret Ralston (F)....Mar. 120
"Hand-painted" fabrics produced by roller printing .....Feb. 268
High-altitude dyeing gives poor results. Nov. 212
Improper combination causes dye trouble .....Feb. 202
Indigo dye is hard to strip.....May 272
Infrared dryer will not scorch cloth. Apr. 150
Instrument improves viscosity of liquids. Feb. 166
Integration of fabric finishes sought. J. F. Oesterling.....Dec. 137
Is your steam dryer eating up money? T. G. Hicks (F).....Feb. 149
Larger cores preferred in package dyeing. E. L. Caswell (F).....Dec. 129
Light beams guide fabric feeding to machine .....Oct. 148
Liquid-level transmitter .....Aug. 140
Mercerization made less costly through new instrument. R. C. Scott (F). June 106
Molten-metal dyeing perfected in England. Fred Brewster (F).....June 94
Nylon brushes replace teasels in woolen gigging. E. H. Helliwell (F)... Sept. 125
Nylon-tricot dyeing calls for careful due selection. F. A. Alter (F).....Apr. 141
Nylonizing—steel nylon absorbs water instantly. W. A. Newell (F).... Sept. 118
One extractor does work of four. Scott & Vaughan (F) .....May 94
Orlon and Fiber V dyeing (F).....Sept. 94
Package-dye plant is well planned. Aberfoyle Mfg. W. A. Thomason Jr. (F). Oct. 112
Package dyeing of rayons would eliminate chafes .....Mar. 193
Paper tube wrapper improves yarn dyeing .....Jan. 124
Photochemical process vat dyes fabrics continuously (F) .....Jan. 98
Photoprinting methods are not very successful .....Sept. 265
Piece-dye kettles with positive knock-off .....Oct. 146
Print-roll data useful to printers. D. G. McGehan (F) .....Feb. 137
Print washing should be checked. T. N. Patrick (F) .....Aug. 127
Printed flannels are napped before printing .....Mar. 193
Production machine cuts and stacks pieces at high speed .....July 248
Reflection meter specifies, matches colors .....Aug. 144
Resin-treatment evaluation. D. D. Gagliardi & others.....Dec. 133
Sample dye baths mechanically agitated. Feb. 170
Screen-printing machine .....Mar. 142
Sept. 138
Selvage trimmer .....July 238
Short cut can be made in dye application. F. E. Alter .....July 196
Silicone water repellent easily applied to nylon. F. L. Dennett (F)....Feb. 155
Singeing machine for worsted.....Sept. 144
Soft-water system saves $1,040 a year. E. D. White (F) .....Aug. 120
Static electricity is measured positively. Mayek & Chromey.....Dec. 135
Streaky dyeing tested. Harry New (F). May 86
Stream pollution control calls for waste analyses. J. A. McCarthy (F)....June 102
Supplies and accessories at American Textile Machinery Exhibition (F) July 138
Synthetic processing. A. S. McLean Dec. 131
Test your textile IQ.....May 140
"Textralizing" process imparts permanent crimp to fibers. Pfau & Hay (F) .....Dec. 106
Thermocouple recommended for J-boxes and steamers. Bowden & Daubert. Dec. 128
Transfer system marks 600 pieces per hour .....Apr. 148
Trends of the textile half-century (F). July 100
Trimmer, low-cost, and portable unit. Aug. 136
Truck won't drip on operator's feet. Aug. 136
Ultrasonics gets green light for textile industry. W. A. Newell (F).....Jan. 90
Urea can be used to stop fabric odor. L. A. Fluck .....Dec. 133
Vacuum-extracting box for better hand. Oct. 184
Viewer simulates human observer..May 118
Violet for cellulosics .....Aug. 148

(F) indicates feature article

Warp dyeing and slashing in a continuous operation. R. C. Scott (F)...Sept. 114
Warp-size modifier ...Sept. 150
Waterproof coated fabric that breathes (F) ...Mar. 109
Waterproofing lame fabric ...July 212
Water repellant ...Aug. 148
Wax activator ...Aug. 148
What's cooking in new resin treatments. R. M. Fischer (E) ...June 129
Wool dyes stripped without chemical changes. Leonard & Beck ...Dec. 130

F

Fibers

British Terylene presents dyeing problems (F) ...June 117
Du Pont fibers to come (F) ...Sept. 94
Dynel dyeing tips (F) ...Dec. 126
Dynel staple now in commercial production at Carbide and Carbon plant (F) ...Sept. 101
Fibrous glass—emphasis is on improvements (F) ...Sept. 104
French polyvinyl-chloride fiber features durability (F) ...Apr. 120
How a new fiber is developed (F)...Sept. 97
The next ten years. C. W. Bendigo (F) ...Oct. 4
Orlon and Fiber V dyeing (F) ...Sept. 95
Peanut, cottonseed protein and casein fibers from Southern Regional Research Laboratory (F) ...Sept. 102
Synthetic fibers—new and improved. C. W. Bendigo (F) ...Sept. 92
Synthetics booming again in 1950. R. C. Scott (F) ...Sept. 89
Tests for Orlon fibers ...Feb. 260
Two decades. C. W. Bendigo ...Sept. 4
Vinyon HH staple—questions and answers. H. E. Shearer (F)...Dec. 100
What mean fiber lengths mean to yarn quality. E. H. Helliwell (F)...Mar. 129

G

Glass Fabrics

Fibrous glass—emphasis is on improvements (F) ...Sept. 104
Permanent dyes and finishes. Margaret Ralston (F) ...Mar. 120

Great Britain

Centrifugal spinning reaches 16,000 rpm. Harold Farnsworth (F) ...June 116
Modernized British mill (F) ...Mar. 139
Molten-metal dyeing perfected in England. Fred Brewster (F) ...June 94
Terylene presents dyeing problems (F) ...June 117
Wool research follows three main lines. ...Jan. 145
Guide to exhibitors—American Textile Machinery Exhibition ...May 145

H

Hosiery

Aluminum hosiery tray ...Sept. 137
Anklet knitting machine ...Aug. 136
Argyle socks knit on new machines ...Feb. 164
Automatic knock-off for full-fashioned machine. D. H. Turner ...Mar. 160
Hans Bick plant camera tour (F)...Oct. 96
Boarding machine designed for varying steam pressure ...July 171
Canadian textile seminar discusses textile modern methods ...Dec. 139
Change gears corrected for twist contraction ...Nov. 196
Cocooning protects full-fashioned machines (F) ...June 131
Comal Hosiery mill has model features (F) ...Jan. 86
Diamond Mill expansion increases output 1306% ...Aug. 123
Dryer eliminates final boarding ...Nov. 176
For quality knitting
Four motions key to full-fashioned hose. H. B. LeFeaux (F)...Apr. 108
Half-hose machine adjustment. E. D. White (F) ...Apr. 110
Special needs of worsted. W. A. Simond (F) ...Apr. 112
Pay attention to needles. Charles Arrowood (F) ...Apr. 113
Full-fashioned machine operation improved by modified circuit. E. H. Helliwell (F) ...Feb. 135
Full-fashioned survey shows fewer machines, same production (F)...Aug. 131
Headless timing screw saves machine work. W. A. Simond ...July 163
How fine can you go? C. W. Bendigo ...Jan. 4
Inspection form guards stocking during turning ...July 184
Knitting and Allied Crafts Exposition in New York (F) ...June 120
Looper operation improved by preventive maintenance. E. D. White (F)...Sept. 129
Looper training aided by proper vision. R. K. Karn (F) ...May 109
More tension needed at start of sock. J. Rab ...May 136
Needle-bar shaft checked for trueness. W. A. Simond ...Oct. 164
Nylonizing—see! nylon absorbs water instantly. W. A. Newell (F)...Sept. 118
60-gage machines produce more slowly, but better. H. B. LeFeaux (F)...May 74
Solid-color patterns produced automatically ...July 171
Stocking packer ...Oct. 145
Streaky dyeing tested. Harry New (F)...May 86
Test compares pressed-rivet and screw-rivet needles (F) ...Jan. 115
Thread-ratio control for hosiery seamers ...Sept. 138
Three-carrier knitting solves uneven-yarn problem. H. B. LeFeaux (F). ...Sept. 112
Trends of the textile half-century (F). ...July 100
True IXI rib fabrics knit on single-cylinder machine. Harry Wignall (F). ...June 114
Welt-turner settings must be precise. H. B. LeFeaux (F) ...Mar. 110
Year of new equipment for the textile industry ...Nov. 110–146

Cotton yarn mill has unusual machinery (F) ...Aug. 108

K

Knit Goods

Binocular loupe used in knitting mills. ...June 150
Carbide braider formers have increased life ...May 112
Centrifugal spinning reaches 16,000 rpm. Harold Farnsworth (F) ...June 116
Circular knitter's running-on tool. J. Rab. ...May 130
Cloth is part roll determined quickly. W. E. Barrett ...Apr. 162
Constant control yields quality knit wear. E. D. White (F)...Mar. 122
Construction sheets—valuable knitting records. Lawrence Levy (F)...Mar. 118
Control of cams improved by double feed. W. A. Simond...June 160
Doff truck eliminates soiled roll ends. ...Apr. 168
Dynel dyeing tips (F)...Dec. 126
For quality knitting
Checklist can improve garment fabric. E. D. White (F) ...Apr. 114
Cleanliness is important in outerwear. Lawrence Levy (F) ...Apr. 116
Gentle finishing on sweaters gives lofty hand ...Mar. 178
Heat-setting nylon tricot fabrics...Jan. 128
Hot air sets nylon on pin tenter...July 178
Inlaid filling yarns increase versatility. Harry Wignall (F) ...Oct. 114
International Knitting Machinery exhibition at Leicester Show (F)...Dec. 116
Knitting and Allied Crafts Exposition in New York (F) ...June 120
Knitting and Allied Crafts Exposition—guide to exhibitors (F) ...Apr. 181
Kuljian machine improved (F)...Sept. 101
Lower needle butts to replace cam section. J. Rab ...Mar. 158
Machinery developments in 1950. W. A. Newell (F) ...Feb. 112
New ribber design raises production ...Feb. 172
1950 production: more sustained than in 1949. R. P. Ulin (F) ...Jan. 108
Novelty yarns made on tricot machines. C. W. Bendigo (F) ...Jan. 83
Painted supply bobbins raise knitter's quality. Preling Lawrence ...Jan. 141
Pattern-chain guide made of sheet metal. Joseph Rab ...July 159
Pneumatic tester checks knit shrinkage ...Feb. 174
Soft-water system saves $1040 a year. E. D. White (F) ...Aug. 126
Spare-ends take-up for knitting machine ...July 163
Spring-tension gage useful to loopers. J. R. Worth ...June 158
Supplies and accessories at American Textile Machinery Exhibition (F)...July 138
Test your textile I. Q. ...May 148
Three knitting machines ...July 176
Trends of the textile half-century (F). ...July 100
Tricot fabrics analyzed. R. F. Eshleman (F) ...Feb. 122
Tricot-knitting machine ...Nov. 184
Tricot needles replacement. J. Rab Sept. 296
Twin-knitter ...Mar. 154
Warper permits flexibility in making tricot ...Mar. 141
We measure our beams to insure uniform tension. J. Rab ...Sept. 156
Woven-to-knit pattern is work for a designer ...Aug. 174
Yarn supply is critical in knitting worsted jersey. Lawrence Levy (F). ...Jan. 97
Year of new equipment for the textile industry ...Nov. 110–146

Maintenance

Air compressors need proper maintenance. T. G. Hicks (F) ...June 104
Antifriction bearings demand high-quality lubricants. C. A. Berg (F). ...May 97
Belt performance needs maintenance. E. H. Helliwell (F) ...June 112
Brace and wooden bits clean internal threads. W. E. Warner ...Apr. 166
Broken taps removed easily. W. E. Warner ...June 162
Chemical treatment preserves wooden brushes ...Oct. 146
Cylinder-screen gage. T. J. McCarthy. ...Oct 170
Extension cords protected by coating. W. E. Warner ...Nov. 202
Floor brush broom used to paint fence. ...Jan. 141
Floor magnet unloads at both ends. Apr. 134
Gage for round stock ...Oct. 166
Groove in roll arbor speeds front-roll oiling. D. V. Sampat. ...May 134
Heating pipe section placed in air line. W. E. Warner ...Jan. 142
How lubrication licks friction...Apr. 176
How to shim oversize bearings...Aug. 156
Hydrometer for battery care...July 216
Industrial supplies at American Textile Machinery Exhibition (F) ...July 151
Lathe cup collet replaces draw-in collet. W. A. Simond ...Nov. 198
Light tubes replaced according to schedule ...Nov. 216
Looms steam-cleaned ...Apr. 150
Looper operation improved by preventive maintenance. E. D. White (F). Sept. 129
Lubricating oil useful on dryers. June 146
Lubricator runs from built-in battery. ...Apr. 150
Measuring steel-roll settings ...Oct. 168
Metallizing speeds repairs on textile machine parts. J. E. Wakefield (F). Jan. 104
Miller used to do a lathe's work. H. Jacoby ...Sept. 296
Plant Maintenance Show, Cleveland, Ohio (F) ...Mar. 114
Pump lubricants must be selective...July 214
Quality of water affects boiler efficiency. ...Feb. 262
Rotary magnet sweeps, picks up needles. ...June 140
Scrubber useful in narrow mill aisles. ...June 148
Silicone oils for lubricants ...Feb. 157
Small tools knurled with files. H. Jacoby ...Feb. 186
Spindle-oiling machine carries its own power ...Sept. 140
Stainless steel needs proper maintenance. G. L. Smalz Jr. (F)...Apr. 128
Stove polish lubricates ends of card flats. Thomas McCarthy ...Jan. 140
Vise-jaw damage prevented by tube. W. E. Warner ...Nov. 198
Work bench, portable ...Nov. 204
Worn gear teeth repaired by welding. L. J. Roy ...May 134

Management

Check up on your production efficiency. Macon Miller (F) ...Nov. 192
Three secrets of being a good supervisor. Macon Miller (F) ...May 127
What Herman Burns expects from his supervisors. J. M. Scott Jr. (F)...July 187
Marshall-Plan funds boost world textile revival (F) ...Feb. 117

Merchandising

Measuring system called old-fashioned. C. E. Hunn ...Feb. 192

Mill Engineering

ASME analyzes mill modernization (F) ...Dec. 103
Air compressors need proper maintenance. T. G. Hicks (F) ...June 104
Air-conditioner, central-system ...July 241
Air conditioner for laboratory ...Nov. 180
Air-conditioning, heating, and ventilating equipment at American Textile Machinery Exhibition (F) ...July 146
Air conditioning in weaving plant designed with needs in mind (F)...Oct. 114
Asbestos on oil pipes. W. E. Warner ...Sept 296
Belt performance needs maintenance. E. H. Helliwell (F) ...June 112
Cables drawn in conduit through guide holes. W. E. Warner ...Dec. 168
Controlling, measuring, testing equipment at American Textile Machinery Exhibition (F) ...July 143
Conveyor, floor-to-floor, works like Ferris wheel ...Apr. 184
Cocooning protects full-fashioned machines (F) ...June 131

Device adjusts capacity of atomizers. June 144
Drilling made accurate by guide and spacers. A. M. Morris ..... Oct. 162
Economy drive spurs engineering developments. C. P. Wood (F) ..... Feb. 115
Electrical equipment can be cotton mill fire hazard. Swaffield Cowan (F) ..... Aug. 116
Electron microscope ..... July 244
Electronic control ..... Feb. 164
Erwin modernizes a run-down mill. M. M. Rogers, Jr. (F) ..... Dec. 104
European machinery offers tests of new ideas. E. D. Fowle (F) ..... Feb. 120
Fiber-converting plant—Collins & Aikman's Norwood Mill (F) ..... Sept. 106
Fluid drives valuable on textile machinery. E. H. Helliwell (F) ..... Sept. 132
Fluorescent lamp ..... Jan. 132
Fork truck ..... Aug. 144
GE exhibit train on tour ..... June 115
Get any handling ideas from these? ..... Apr. 118
Glen Raven Silk Mill is virtually windowless (F) ..... May 103
Guide plate for punch. A. R. Baker ..... Jan. 140
Handling devices reduce damage to cloth rolls. Roy Denial (F) ..... Jan. 106
Heat exchanger ..... Jan. 198
Heating coil ..... Sept. 146
Herman Burns discusses supervisor's wants. J. M. Scott (F) ..... Jan. 121
Hoist of 8½ lbs. ..... Apr. 150
Homogenizer ..... Mar. 150
Hot-plate element ..... Jan. 132
Hot-water heater ..... May 116
How much power does a spindle use? (F) ..... Dec. 122
Humidifiers ..... Jan. 196, May 118, Sept. 222
Humidity and temperature recorder. Aug. 138
Humidity, instrument indicates ..... July 180
Humidity systems can be engineered simply. T. G. Hicks (F) ..... June 118
Instrument measures radiant heat loss. Oct. 190
Is your steam dryer eating up money? T. G. Hicks (F) ..... Feb. 149
Jack and vibration pads combined ..... June 146
Job load depends on many factors ..... May 276
Joint has lapped bearing surfaces ..... July 172
Joint, revolving ..... Nov. 186
Knitting-yarn trucks conveyed by simulator. E. D. White ..... Oct. 168
Layout of mill revised to provide for future expansion. H. W. Roos (F). Apr. 103
Leather belt has controlled stretch ..... Oct. 156
Lift truck ..... Mar. 152
Lock nut spreads bolt. W. E. Warner. Feb. 184
Machinery developments in 1950. W. A. Newell (F) ..... Feb. 112
Materials handling—how to investigate your problems. H. L. Werner ..... June 96
Mechanical engineers needed in textile industry. C. D. Townsend ..... Aug. 160
Mechanical inspection not practical yet. Sept. 268
Miller used to do a lathe's work. H. Jacoby ..... Sept. 296
Moisture-regain indicator ..... Sept. 160
Moving ten roving frames in eight hours. C. H. Leach (F) ..... Feb. 132
New England mill solves problem by rebuilding looms. E. H. Helliwell (F). Apr. 122
New steam plant designed for big load. E. D. White (F) ..... Feb. 141
Nylon block and cloth-roll bearing ..... Jan. 124
Obsolescence. C. W. Bendigo ..... July 4
Paint treated-fiber roofs for best service. H. W. Ansell (F) ..... Mar. 135
Plant Maintenance Show, Cleveland, Ohio (F) ..... Mar. 114
Power sweeper works in narrow aisles. Apr. 244
Power and transmission equipment at American Textile Machinery Exhibition (F) ..... July 147
Pulleys of aluminum ..... Mar. 148
Pumps ..... Aug. 142, Sept. 148, Sept. 320
Punch used on round stock ..... Jan. 141
Purchases in 1949 higher than expected. C. W. Bendigo (F) ..... Feb. 111
Rack on truck improves cloth handling. W. C. Westbrook ..... May 130
Range-drive selection. C. V. Topliffe (F) ..... May 88
Recorder-controller watches temperatures ..... Sept. 148
Refrigeration can pay for itself. P. L. Davidson (F) ..... Feb. 159
Rotary swivel joint ..... Feb. 162
Rule measures pulley diameters ..... Feb. 182
Signal lamps show action of acid pumps. A. R. Baker ..... Nov. 199
Six ways to apply insulation ..... July 161
Slasher take-up uses magnetic-clutch motor. J. S. Campbell (F) ..... Oct. 168
Slip clutch used on card drives ..... June 146
Soft-water system saves $1,040 a year. E. D. White (F) ..... Aug. 120
Starter gives smooth start-up to frames. June 148
Steam trap ..... Oct. 148
Straddle dispenser ..... Sept. 142
Stream pollution control calls for waste analyses. J. A. McCarthy (F) ..... June 102
Tag instrument controls humidity ..... June 156
Temperature recorder can be changed to pressure recorder ..... Aug. 136
Trends of the textile half-century (F). July 100
Truck, hand, in two types ..... Nov. 186
Truck, platform ..... Jan. 204
Truck, roving, has inclined roller bottom. Aug. 138
Truck used for beam handling, drawing in ..... June 150
Truck won't drip on operator's feet ..... Aug. 136
Valve designed for pressures below 250 psi ..... Sept. 319
V-S drive handles ¾ to 2 hp needs ..... Apr. 154
Ware Shoals bleaching controlled by automatic instruments. J. M. Bennett (F) ..... Jan. 94
Waste-treatment cost need not be excessive. W. B. Goode (F) ..... Jan. 100
Water pollution. Lyman Cox ..... Dec. 137
Water softener ..... Jan. 200, Sept. 148
Weather-Ometer ..... July 184
Weaveroom swaying stopped by cadence control. G. A. Winterburn (F) ..... Aug. 118
Where can your mill use nylon plastic? (F) ..... Oct. 103
Wire-mesh container ..... Sept. 148
Year of new equipment for the textile industry ..... Nov. 110-146

Modernization

Diamond hosiery mill expansion increases output 130% ..... Aug. 125
Erwin modernizes a run-down mill. M. M. Rogers, Jr. (F) ..... Dec. 104
Obsolescence. C. W. Bendigo ..... July 4

N

National Assn. of Textile Machinery Mfrs. American Textile Machinery Exhibition (F) ..... July 101-153
1960 in the U. S. and the world and in the textile industry (F) ..... July 102

Nylon

Collins & Aikman's fiber-converting plant (F) ..... Sept. 106
Crimp set in steam chamber ..... Nov. 178
Dyeing nylon-tricot calls for careful dye selection. F. A. Alter (F) ..... Apr. 141
Dyeing with coprantine colors. M. G. Stern (F) ..... Apr. 132
Fabric stabilized after dyeing ..... Feb. 172
44 tips on processing nylon staple (F). Apr. 137
Headless packages to hold nylon ..... Feb. 166
Heat-setting machine uses liquid ..... Feb. 168
Heat-setting nylon tricot fabrics ..... Jan. 128
Hot air sets nylon on pin tenter ..... July 178
How a new fiber is developed (F) Sept. 97
Molded-plastic bobbin barrel withstands nylon ..... Nov. 175
New device stops reediness in nylon. W. E. Mann (F) ..... Aug. 99
Nylon can raise wool spinning limits. R. D. Bennett (F) ..... Feb. 125
Nylon-yarn bobbin is almost completely solid ..... Apr. 236
Nylonizing—see! nylon absorbs water instantly. W. A. Newell (F) ..... Sept. 118
Pacific Converter. J. B. Kennedy, Jr. (F) ..... May 76
Pot-spinning system increases production. E. H. Helliwell (F) ..... Apr. 124
Raw-nylon sizing is critical operation (F) ..... Jan. 93
Research has fruitful year in 1949. P. M. Thomas (F) ..... Feb. 113
Silicone water repellent easily applied to nylon. F. L. Dennett (F) ..... Feb. 155
Skein reeling operations for all types of yarn. R. W. Harbeck (F) ..... Apr. 130
Spindle bracket has positive brake ..... Sept. 142
Synthetics booming again in 1950. R. C. Scott ..... Sept. 89
Tricks speed nylon tying and quilling. H. E. Wenrich (F) ..... Feb. 147
Ultrasonics gets green light for textile industry. W. A. Newell (F) ..... Jan. 90
Viscosimeter designed for nylon sizing ..... Aug. 144
Year of new equipment for the textile industry ..... Nov. 110-146

O

Orlon

Fiber V and Orlon dyeing ..... Sept. 95
Fiber tests ..... Feb. 260
Synthetic fibers—new and improved. C. W. Bendigo (F) ..... Sept. 92

P

Public Relations

Activity Vector Analysis is a simple placement test. William Eastman (F). Mar. 154
Activity Vector Analysis reveals facts about menders. William Eastman (F). Sept. 162
Activity Vector Analysis used to study Lybridge weavers. William Eastman (F) ..... June 153
Are you assigning work loads fairly? H. P. Lynch (F) ..... June 92
Avondale Mills human-relations program. P. M. Thomas (F) ..... Oct. 121
Herman Burns discusses supervisor's wants. J. M. Scott (F) ..... Jan. 121
Herman Burns tackles some touchy problems. J. M. Scott, Jr. (F) ..Apr. 160
Co-operation training helps mill and man. C. D. Townsend ..... Sept. 166
Do you take the time to analyze yourself? ..... Feb. 190
Don't be a "lone-wolf" supervisor. M. P. Miller (F) ..... Aug. 133
Don't get "dumber every year". C. W. Bendigo ..... Dec. 4
Down time and its causes recorded ..... July 182
Exploring the textile community. Mildred B. Andrews (F) ..... Aug. 112
Georgia Institute of Technology, the latest in textile education (F) ..... Feb. 130
Getting down to basic truths makes human relations easier. Macon Miller. Feb. 179
Good food leads to understanding. Mildred B. Andrews (F) ..... Nov. 191
Good health leads to good morale. M. B. Andrews (F) ..... Dec. 175
Good vision is necessary for efficient production. J. G. Shadow (F) ....Apr. 143
Graphs give employees a clearer picture. G. M. Dodson ..... May 140
Handicaps found in one-industry towns. G. M. Dodson ..... May 140
Help your workers adjust to new production methods. William Eastman (F) ..... Dec. 157
How do you rate on your community relations? Hudson Nix (F) ..... Oct. 118
Human-relations ideas your mill can use. Paul King (F) ..... Oct. 161
Individual employee is center of attraction in 1950. M. P. Miller (F) Feb. 116
Let the worker know what it's all about. June 164
Productivity—check up on your production efficiency. Machon Miller (F). Nov. 192
Profit sharing really works at American Velvet Co. E. H. Helliwell (F). Dec. 124
Proper indoctrination. M. B. Andrews (F) ..... Sept. 155
Ready to talk pensions? W. A. Newell (F) ..... June 4
Recreation as an avocation. Mildred Andrews (F) ..... Oct. 143
Selling ideas requires a definite program. G. M. Dodson ..... Aug. 162
Talkative foreman can be made asset. G. M. Dodson ..... Sept. 164
Three secrets of being a good supervisor. Machon Miller (F) ..... May 127
Time-study machine calculates job loads. June 142
Time-study value depends upon personality and techniques. R. T. Charlton, Jr. (F) ..... Aug. 106
Time study—report of standards department. C. W. Bendigo (F) ..... Mar. 101
Time study—right of mill management to conduct job analysis. C. W. Bendigo ..... No. 4
Treatment of older workers important. G. M. Dodson ..... Apr. 176
Trends of the textile half-century (F). July 100
What Herman Burns expects from his supervisors. J. M. Scott, Jr. (F). July 187
Workers' personal problems will affect efficiency. George Dodson ..... June 166
Purchases in 1949 higher than expected. C. W. Bendigo (F) ..... Feb. 111

R

Rayon Manufacturing

Acetate twill has fillingwise bow ..Mar. 196
Air conditioning in weaving plant designed with needs in mind (F) ....Oct. 116
Alabama Textile Operating Executives meet (F) ..... Aug. 129
Aluminum warp beam has rubber-tired rims ..... Mar. 150
Anti-friction spindle ..... Sept. 137
Avisco—two-prong approach (F) Sept. 100
Bleaching, continuous, has advantages in U. S. ..... Nov. 210
Bleaching plant, small ..... Mar. 146
Bleaching range designed for small lots ..... Aug. 135
Bobbin finish reduces snagging ..... Oct. 152
Bobbin of plastic ..... Aug. 140
British winder ..... Oct. 152
Cake holder and fixer for winding. Oct. 154
Calculating rayon-fabric strength. Rene Bouvet (F) ..... Oct. 131
Canadian textile seminar discusses modern methods ..... Dec. 139
Card knife plates set with trowel gage. T. J. McCarthy ..... June 156
Card webs used for bonded-web fabrics. June 180
Carder a judge of fineness and length? William Shaw ..... Sept. 168
Caustic and hypochlorite produced by small unit ..... Nov. 180
Celanese—emphasis is on research (F). Sept. 98
Chain drive builds better bobbins. May 116
Chalk marks help reduce imperfect work. E. H. Helliwell (F) ..... Jan. 113
Chalk sticks held for double marking. June 160

Circuit used to check bobbin wear. W. C. Gibson.....June 156
Clamp, adjustable, holds loom shuttle. Aug. 151
Clips join cloth ends for wet processing. E. Swindells.....Feb. 186
Cloth guiders.....Mar. 150
Cloth-inspection machine has under lighting.....Apr. 170
Cloth-pulling machine moves wet or dry cloth.....June 142
Cloth tension bars curved as desired. E. Swindells.....May 128
Collins & Aikman develops a universal drafting system. W. A. Newell (F). June 89
Colored bands on cans avoid silver mixups.....Mar. 162
Continuous ranges proved for dyeing synthetics. F. A. Alter (F).....May 105
Contraction requires draft correction. J. F. Bogdan (F).....Apr. 107
Control spray assures uniform oiling and tinting. R. D. Robinson (F).....June 100
Controlling, measuring, testing equipment at American Textile Machinery Exhibition (F).....July 143
Conveyor feeds spooler, removes quills. July 171
Core with metal end.....May 112
Cotton-slashing system more economical than silk.....Apr. 202
Counter reads in dollars and cents. Sept. 146
Creased selvages can be remedied. Aug. 176
Crepe and voile yarns conditioned by special machine.....May 119
Crepe-yarn quilling wind open to debate.....Jan. 146
Crown College improves package-dyeing system. C. H. Leach (F).....Oct. 92
Design your own peeling diamond pattern. R. M. Harbeck (F).....May 85
Device measures yarn and sliver... Oct. 148
Dobby cord and shaft held securely. F. M. Giordano.....Mar. 166
Doubling-frame length controller.....Jan. 154
Dowel pin prevents splitting of binder. Aug. 140
Draw-frame elimination may not be for you.....Oct. 174
Dryer efficiency. Leo Walter (F). Aug. 100
Drying-cylinder cover has forced draft. Jan. 128
Du Pont fibers to come (F).....Sept. 94
Dyeing with coprantine colors. M. G. Stern (F).....Apr. 132
Empty bobbins affect traveler drag. E. H. Helliwell (F).....Sept. 135
European machinery offers tests of new ideas. E. D. Fowle (F).....Feb. 126
Examining, measuring machine.... June 144
Fabric samples perplex reader.....Nov. 209
Fiber-converting plant—Collins & Aikman's Norwood Mill (F).....Sept. 106
Fiber tester.....Feb. 170
Filling-quill is made from a barrell. M. A. Morrisseau.....Mar. 160
Filling separator helps weaving.....Sept. 160
Filter changes medium automatically. Oct. 150
Fluid drive for mules.....Jan. 130
Four new trends in slasher controls (F). Mar. 137
Frame efficiency figures can show up losses. H. P. Lynch (F).....Feb. 145
Full warp wind is seldom desirable. Mar. 188
Good top-roll covers vital to quality yarn. E. H. Helliwell (F).....Sept. 89
Guard on slubbers reduces end breakage. William Shaw.....Feb. 184
Guides for folder increase production. May 136
H & R introduces new drafting system. Apr. 238
Hand needle uses.....Apr. 164
Handling devices reduce damage to cloth rolls. Roy Denial (F).....Jan. 106
Heat-setting machine uses liquid.....Feb. 168
Here's a mill man's lab. Erwin Mills. W. A. Thomason, Jr. (F).....Oct. 89
Hose on waste machine reduces fire damage. Vivian Stephansen.....Feb. 186
How much drawing is now necessary? May 138
How to double picker-sticker life. Oct. 170
Humidity systems can be engineered simply. T. G. Hicks (F).....June 118
In my lifetime. H. G. Lord (F).....June 154
Incoming-material inspection pays off. Jesse De La Rama (F).....May 71
Inspection forms reduce picking...June 148
Inspector marks defects with heavy sewing thread.....Jan. 148
Instrument locates static electricity. June 148
Instrument records downtime of machines.....June 144
Know mill processes to identify defects. J. B. Goldberg (F).....Aug. 104
Kuljian machine improved (F).... Sept. 101
Labeling machines for yarn packages. Sept. 144
Lap-handling system meets unusual demands. E. D. White (F).....May 92
Larger spinning ring will not increase twist.....Mar. 178
Layout of mill revised to provide for future expansion. H. W. Ross (F). Apr. 103
Lockstitch machine.....Oct. 152
Long-staple rayon waste made economically on flax card. S. A. G. Caldwell (F).....Mar. 108
Loom cam lever protected by wood. J. M. Trebilock.....Jan. 139
Loom cloth roll has wrinkle chaser. C. R. Botget.....June 158
Loom conditions cause uneven weaving. May 273
Loom picker stick reinforced with metal. A. S. Musto.....May 134
Lug-strap connector.....Aug. 138
Machinery developments in 1950. W. A. Newell (F).....Feb. 112
Magnet for tramp iron removal. Sept. 146
Measure top-roll wear to guide in regrinding.....Apr. 166
Measure up your quality-control lab. Dame S. Hamby (F).....Sept. 120
Mechanical holders help rolled selvages. Apr. 198
Metal detector.....Jan. 196
Micarta lap roll made standard.... Feb. 168
Mill activity will be high again in 1950. R. C. Scott (F).....Feb. 107
Mirror on porch saves inspector time. M. A. Morrisseau.....Mar. 164
Moisture meter.....Oct. 150
Narrow fabric finishing—riser eliminates damage.....Nov. 178
New England mill solves problem by rebuilding looms. E. H. Helliwell (F). Apr. 122
New lay gear formula more accurate. J. F. Brogan (F).....Oct. 135
New rayon mill is virtually windowless (F).....May 102
1950 expenditures and commitments reach an all-time high. R. C. Scott (F).....Nov. 108
1950 production: more sustained than in 1949. R. P. Ulin (F).....Feb. 108
No standards for yarn winds.....Mar. 194
Novelty yarns made on tricot machines. C. W. Bendigo (F).....Jan. 82
Nylon-plastic saddle.....Oct. 184
Oil application on pin drafter controlled. Apr. 148
Pacific Converter. J. B. Kennedy, Jr. (F).....May 76
Peg pattern chains with special pliers. H. E. Wenrich.....Mar. 166
Photochemical process vat dyes fabrics continuously (F).....Jan. 99
Pick counter records and prints.... May 114
Picker ball and shoe time the loom pick. May 270
Pile-loom wire motion.....Jan. 134
Pot-spinning system increases production. E. H. Helliwell (F).....Apr. 124
Profit sharing really works at American Velvet Co. E. H. Helliwell (F) Dec. 124
Quality control men are out of the dark. W. A. Thomason, Jr. (F).....Oct. 94
Quiller creelboard has permanent studs. J. L. Rankin.....Aug. 158
Radioactive thickness gage.....Oct. 156
Rayon-spinning machine.....July 180
Rectangular-eye heddles reduce friction. Oct. 145
Refrigeration can pay for itself. P. L. Davidson (F).....Feb. 159
Ribbon mill increases production by cotton system slashing rayon yarns. E. D. White (F).....Jan. 117
Roving defects have simple causes and remedies. R. H. Pharr (F).....June 135
Roving frame change gears.....May 132
Rubber tubing stops roll vibration. William Shaw.....June 162
Selvage marking machine.....Feb. 168

Ralston, Margaret. Permanent dyes and finishes applicable to glass fabrics. Mar. 120
Rankin, J. L. Quiller creelboard has permanent studs ..... Aug. 158
Richardson, Howard B. & R. W. Webb. Relation of fibers and yarn influenced by several factors ..... Feb. 128
Robinson, Robert D. New control-spray assures uniform oiling and tinting. June 100
Rogers, M. M. Jr. Erwin modernizes a run-down mill ..... Dec. 104
Roos, H. Warren. Revised layout provides for future expansion ..... Apr. 103
Roy, L. J. Warp repairs with tape. May 132
Worn gear teeth repaired by welding. May 134

S

Sampat, V. D. Groove in roll arbor speeds front-roll oiling ..... May 134
Saxl, Victor. New French system cuts costs, ups production ..... Oct. 110
Schremp, Eugene P. You can stop crooked filling patterns ..... Mar. 116
Scott, John M., Jr. Herman Burns discusses supervisor's wants ..... Jan. 121
Herman Burns tackles some touchy problems ..... Apr. 160
What Herman Burns expects from his supervisors ..... July 187
Scott, O. O., Jr. & Raymond Vaughan. One extractor does work of four. May 94
Scott, Richard C. Another milestone is passed ..... Aug. 4
Less costly mercerization possible. June 106
Mill activity will be high again in 1950. Feb. 107
New positively controlled tension permits continuous warp dyeing and slashing ..... Sept. 114
1950 expenditures and commitments reach an all-time high ..... Nov. 108
1950 textile bibliography ..... Aug. 87
Production of synthetics booming again in 1950 ..... Sept. 89
Scott, Walter M. Tire-cord uniformity improved by variable stretching. Feb. 153
Shadow, Jesse G. Good vision is necessary to efficient production ..... Apr. 143
Shaw, William. Can your carder judge fineness and length? ..... Sept. 168
Card sliver evener than finisher drawing. July 167
Hook under thread board catches whipping end ..... June 156
How to loosen stuck spindles ..... Oct. 168
Improper tension causes one tight end. Sept. 274
Small rubber tubing stops roll vibration. June 162
Smooth builder and dog cause tangled roving ..... July 155
Wire guard on slubbers reduces end breakage ..... Feb. 184
Shearer, Howard E. Questions and answers about Vinyon HH staple ..... Oct. 100
Sickles, Charles L. Scotch tape used in dissecting cloth ..... Jan. 141
Simond, Walter A. Control of cams improved by double feed ..... June 160
Headless timing screw saves machines work ..... July 163
Keep in mind special needs of worsted yarns ..... Apr. 112
Lathe cup collet replaces draw-in collet. Nov. 198
Needle-bar shaft checked for trueness. Oct. 164
Small-work holder speeds lathe work. Apr. 164
Smith, Herbert O. & C. F. Goldthwait. California's new cotton shows big improvement ..... Sept. 127
Smith, Robert A. Woolen-yarn back twist held by small hooks ..... June 165
Snair, Grant L., Jr. Stainless steel needs proper maintenance ..... Apr. 128
Sorensen, S. T. Empty winder bobbins doffed mechanically ..... Oct. 166
Spivey, Arthur. Double-diameter sheaf cuts twist in half ..... Nov. 198
Stansbury, Mack F. & C. L. Hoffpauir. Having trouble with new Acala cotton? ..... May 95
Stephansen, Yivinn. Hose on machine reduces fire damage ..... Feb. 186
Stern, M. G. How to dye with coprantine colors ..... Apr. 132
Swindells, E. Clips join cloth ends for wet processing ..... Feb. 186
Cloth tension bars curved as desired. May 128

T

Thomas, P. M. How Avondale Mills works its human-relations program ..... Oct. 121
Textile research has fruitful year in 1949 ..... Feb. 113
New openers and pickers make evener, cleaner laps ..... Mar. 112
Thomason, W. A., Jr. Here's a mill man's lab ..... Oct. 89
New package-dye plant is well planned. Oct. 112
Quality control men are out of the dark. Oct. 94
Topcliffe, C. V. Many factors govern range-drive selection ..... May 88
Townsend, C. D. Consulting engineer or plant engineer? ..... July 167
Co-operation training helps mill and man ..... Sept. 166
Mechanical engineers needed in textile industry ..... Aug. 160
Trebilcock, J. M. Loom cam lever protected by wood ..... Jan. 139
Turner, D. H. Automatic knock-off for full-fashioned machine ..... Mar. 160
Shear pins in slur cams reduce damage to parts ..... Aug. 158
